MEMORANDUM

To: David Szymanski 
From: Martin Doster
Subject: Lead Smelters List

Date: January 20, 2012

This memorandum is being written to update my Memorandum of October 30, 2002 (attached,) which reported the status of potential lead smelter sites in the Buffalo, NY area of NYSDEC Region 9. Only sites with NYSDEC program-related remedial projects are updated below.

Battery Lead Smelters:

856 E. Ferry Street, Buffalo (C) – Michael Hayman

Site has been remediated under the State Superfund (SSF) Program and has been reclassified to Class C site on the Inactive Registry of Hazardous Wastes (registry #916175.)

779 Walden Avenue, Depew (V) – Magnus Metals Div.

No records were found for Magnus other than for their facility which became the N.L. Industries Site on Walden Avenue in the Village of Depew. The N.L. Industries Site was initially entered into the NYSDEC Voluntary Cleanup Program (Site #V00353) and was subsequently remediated under the NYSDEC Brownfield Program (Site #C915200). It is currently a Class C Site, and has implemented a Site Management Plan which includes Institutional and Engineering Controls. Also of note, the USEPA has been overseeing off-site remedial work addressing contamination found in the neighborhood proximal to the remediated property.

Babbit and Solder Manufacturers:

1378 Niagara Street, Buffalo (C) – Niagara Metal Co.

Site was adjacent to the ChemCore Site (Registry #915176), which is currently a Class 2 Site (awaiting reclassification) and is currently implementing a Site Management Plan. No information indicating disposal or contamination from the Niagara Metal Co. property has been found, and ongoing remedial work at the former ChemCore facility continues to address both on-Site and off-Site contamination which is associated with the ChemCore Site.

MEMORANDUM

TO: Martin Doster
FROM: David Szymanski *DS*
SUBJECT: Lead Smelters List

DATE: October 30, 2002

This memorandum is being written to report current information found regarding a list of potential lead smelter sites in the Buffalo, NY, area. (See Attached Appendices A & B which are the source of this inquiry). Research at the Buffalo & Erie County Public Library, Central Library, provided Sanborn Map and City Business Directory information. Attached are copies of historical Sanborn Maps and of current Site locations. Below is a brief summary of what was interpreted from resource material for each of the listed sites:

Battery Lead Smelters:

29 Superior Street, Buffalo (C) - Lake Erie Smelting Corp.

Street is no longer in existence: Site is not defined well in Sanborn Maps. Site is now under the Towne Gardens shopping plaza at the corner of William and Jefferson Streets. Sanborn Map copy and photo attached.

856 E. Ferry Street, Buffalo (C) - Michael Hayman

Site is Listed in Registry of Inactive Hazardous Waste Sites: #915175. See NYSDEC Site file.

116 Oak, Buffalo (C) - National Lead

Site is now a municipally-operated parking lot; Sanborn map found. Site address varies in City Business Directories from Clinton St. to Oak St., etc. Sanborn Map copy and photo attached.

399 Genesee, Buffalo (C) - Reliance Lead, Solder & Babbitt Co., Inc.

Site is currently part of a leveled row of lots at the southeast quad of Genesee and Pratt Streets. Soil exposure is noted at surface of former lot. Adjacent new home construction is noted on both Genesee and Pratt Streets; Sanborn map found. City Business Directories indicate additional Plant #2 at 425 Broadway. Sanborn found for this location as well. Noted that a filling station may have existed adjacent to the Broadway parcel in the past. Smelter building at 425 Broadway appears leveled as well and there may be possible soil exposure at this lot. Directories indicate that a business office was also located at 386 Genesee Street. Sanborn Map copy and photos attached.

31 Stone Street, Buffalo (C) - Samuel Greenfield Co.

Site has some structures still on it; Owner (Darul-uloom al Madania) has had contractors excavating soils and stockpiling them onsite; Owner's contractors advised of potential contamination during site visit; Sanborn map found showing additional structures and rail spurs that previously existed on site. Sanborn Map copy and photos attached.

779 Walden Avenue, Depew (V) - Magnus Metals Div.

Invalid address for Village of Depew. Address exists in City of Buffalo, but no records found regarding Site. Magnus had a facility on Ellicott (later changed to Walden Avenue) which became N.L. Industries in Village of Depew. N.L. Industries Site is an inactive hazardous waste site currently under the NYSDEC Voluntary Cleanup Program V00353.

Babbitt and Solder Manufacturers:

328 Howard Street, Buffalo (C) - Buffalo White Metal Co,

On 1899 Sanborn Map, #338 Howard was a pipe shop; part of Jacob Dow Packaging Co. Sanborn Map Found from later date indicating Harry Fox & Co. Scrap Metal on this site. Property is current site of an asphalt parking lot adjacent to the John Paul Court housing development (south of William Street.) Sanborn Map copy and Photo attached.

✕ 197 Lathrop Street, Buffalo (C) - Lumen Bearing Co.

Structure still standing at north end. Building(s) at south end appear to have been demolished. The City of Buffalo currently owns the property. Found on 1899 Sanborn map; Expanded structures on later Sanborn maps. Adjacent to and across from residences; adjacent to active railroad on east side (old "Belt line".) Suspect USTs possibly on site. Sanborn Map copy and photos attached.

925 Bailey Avenue, Buffalo (C) - Merit Metals

No City Business Directory information on site found. A 1916 (updated to 1961) Sanborn map indicating a machine shop/ scrapyards operation was reviewed though no mention of "Merit Metals" was found. Current site of Schemm Machine Co. Sanborn Map copy and photo attached.

2200-2208 Elmwood Avenue, Buffalo (C) - Niagara Falls Smelting & Refining Div.

1916 (updated to 1961) Sanborn map indicating Continental Copper & Steel Industries, Inc. (NFS&R Div.) City Business Directory from 1940 shows business as named, but 1960 Directory indicates it as a Division of Continental Copper & Steel Industries, Inc. Sanborn Map Copy and photos attached.

1378 Niagara Street, Buffalo (C) - Niagara Metal Co.

Currently a parking lot and part of Garrett Leather Co. (former Mentholum Co. property); 1899 Sanborn map showing Holbur Co. at this location; City Business Directory for 1940 indicates existence of Niagara Metal Co. and names of John J. Kelly and Wm. E. Gleason. Adjacent to Chemcore Site #915176 at 1380 Niagara Street. Sanborn Map Copy and photo attached
